PROFESSIONAL SUMMARY

B.Tech student in Computer Science and Engineering (Data Science) with hands-on experience in Python, SQL, Power BI, Machine Learning, and Data Analysis. Skilled in data cleaning, exploratory data analysis, data visualization, and building machine learning models. Developed academic and personal projects using real-world datasets.

TECHNICAL SKILLS

Programming: Python, SQL
Data Analysis: Pandas, NumPy, Exploratory Data Analysis (EDA), Excel, Google Sheets
Data Visualization: Power BI, Matplotlib, Seaborn
Machine Learning: Scikit-learn, Supervised Learning, Unsupervised Learning
Statistics: Descriptive Statistics, Probability, Hypothesis Testing
Data Processing: Data Cleaning, Data Preprocessing, Missing Value Handling, Feature Engineering
Databases: MySQL, PostgreSQL
Tools: Jupyter Notebook, Google Colab, VS Code, Git, GitHub

PROJECTS

Employee Attrition Analysis

Python | *Pandas* | *NumPy* | *Matplotlib* | *Seaborn* | *Power BI*

- Analyzed 1,473 employee records to identify key factors influencing employee attrition.
- Performed data cleaning, EDA, and statistical analysis to uncover patterns across job satisfaction, overtime, age, and experience.
- Created interactive Power BI dashboards to visualize attrition trends and employee insights.
- Developed 20+ business insights and recommendations to support employee retention strategies.

Heart Disease Prediction

Python | *Pandas* | *Seaborn* | *Scikit-learn* | *Machine Learning*

- Analyzed patient health data to identify factors associated with heart disease.
- Performed data cleaning, EDA, preprocessing, and feature analysis.
- Built and evaluated machine learning classification models to predict heart disease.
- Compared model performance using Accuracy, Precision, Recall, and F1-score.

Customer Churn Analysis

Python | *Pandas* | *NumPy* | *SQL* | *Power BI* | *Scikit-learn*

- Analyzed customer data to identify key factors affecting customer churn and retention.
- Performed data cleaning, EDA, preprocessing, and feature engineering.
- Built machine learning classification models to predict customer churn.
- Created a Power BI dashboard to monitor churn rate, customer behavior, and business KPIs.

INTERNSHIP / EXPERIENCE

IBM SkillsBuild Data Analytics with AI Intern | BharatCares × AICTE × IBM SkillsBuild | Aug 2026 – Present

- Participating in a Data Analytics with AI internship focused on data analytics and AI tools.
- Gaining hands-on exposure to data cleaning, data preprocessing, EDA, and predictive analytics.
- Working with Supervised Learning, Regression, Classification and Power BI.
- Developing a real-world data analytics project with AI-driven insights.

EDUCATION

Lloyd Institute of Engineering and Technology, Greater Noida | 2023–2027
B.Tech in Computer Science and Engineering (Data Science) | CGPA: 7.8/10

CERTIFICATIONS

- IBM Generative AI — IBM
- IBM Python 101 for Data Science — IBM
- Data Analytics Job Simulation — Deloitte
